Days to Process by Insurance Type

Executive Summary

This dashboard analyzes healthcare operational and financial performance across departments and insurance providers. The analysis focuses on reimbursement trends, claim approval status, average claim amounts, and processing efficiency.

Key Insights

Orthopedics generated the highest total reimbursement amount.
Medicaid claims had the highest average claim amount.
Self-Pay insurance produced the lowest average claim amount.
Medicaid claims required the longest average processing time...

Recommendations

Improve Medicaid processing workflows to reduce turnaround time.
Investigate denial patterns in Orthopedics and Pediatrics.
Expand operational strategies used in Primary Care to improve approval rates across departments.
Review reimbursement optimization opportunities for lower-performing departments.
